1. About Us

1.1 Introduction

Founded in August 2010, Alnoras Integrated Solutions CO. LTD is a Sudanese investment and contracting company with operations in Port Sudan and Khartoum. Today, alongside electrical contracting, car rental and maintenance, construction, non-food trading, conference organization, transportation, and workshop services, we export premium agricultural crops, forest products, and animal products to global markets

2. Mission & Vision

2.1 MISSION

- To deliver integrated solutions with precision and innovation, contributing to Sudan's sustainable development through diversified, high-quality services.

2.2 VISION

- To be a leading force in Sudan's investment, contracting, and export landscape—renowned for excellence, environmental stewardship, and unwavering dedication to our clients

3. Agricultural Crops

Our Agricultural Exports Division sources and ships Sudan's finest field crops, leveraging the rich Nile-fed soils and favorable climate to ensure consistency, safety, and premium quality.

3.1 Sesame

Sudanese sesame seeds are globally prized for their high oil content (50–52%) and uniform grain size, earning premium prices in Asia and Europe markets. Sudan is one of the world's top producers, accounting for roughly 10% of global exports

3.2 Peanuts (Groundnuts)

Grown under both rain-fed and irrigated conditions, Sudanese peanuts are valued for their high protein and oil yield. Our exporters adhere to stringent food-safety protocols, delivering clean, sorted kernels to buyers around the Middle East and Europe.

3.3 Cotton

Sudan's long-staple cotton, renowned for its strength and luster, remains a sought-after fiber in textile industries. We export ginned and baled cotton that meets international grade standards for thread count and tensile quality

3.4 Hibiscus (Karkadeh)

Cultivated mainly in Kordofan and Darfur, Sudanese hibiscus calyces are famous for their deep crimson color and rich anthocyanin content. Our sun-dried, hand-harvested hibiscus meets the highest purity criteria for tea, extract, and nutraceutical markets

3.5 Dates

Harvested from oasis regions along the Nile, our dates feature a soft texture and balanced sweetness. Sorted by size and grade, they are exported in hygroscopic-sealed cartons to maintain moisture and prevent spoilage

3.6 Mango

Sudan's mango orchards yield juicy, aromatic varieties that are carefully cold-chain packed to preserve flavor and firmness. Our export-grade mangoes comply with international phytosanitary standards for sugar content and skin integrity

4. Forest Products

Our Forest Products Division delivers responsibly sourced goods, adhering to sustainable harvesting and certification requirements

4.1 Gum Arabic

Sudan supplies over 80% of the world's gum arabic, collected from *Acacia senegal* in Darfur and Kordofan. Our exports undergo food-grade cleaning and quality grading to satisfy the beverage, pharmaceutical, and food-stabilizer industries

4.2 Timber

We export premium hardwoods—primarily Acacia and Teak species—harvested under licensed forestry management. Logs and sawn timbers are kiln-dried to international moisture-content specifications for furniture and construction markets

5. Animal Products

Our Animal Products Division focuses on raw and processed goods that reflect Sudan's strong livestock heritage.

5.1 Hides

We export salted and air-dried cattle, sheep, and goat hides to tanneries in the UK, China, UAE, and Turkey. Each hide is inspected and graded for thickness, uniformity, and defect-free surfaces to meet leather-industry standards.

5.2 Honey

Sudanese honey—sourced from acacia, neem, and citrus blooms—is prized for its floral aroma and high antioxidant levels. Our honey is centrifuge-processed, filtered, and tested to ensure purity, then exported under strict traceability protocols. In 2018, Sudan produced 740 t of honey, with export growth of over 200% in five years.
